

University Procurement Management System

User Roles, Actors & Use Case Specification

University of Sri Jayewardenepura

Governing Framework: Government Procurement Guidelines & Procurement Manual (Revised 2024)

Classification: Confidential

1. Project Objective

To develop a web-based University Procurement Management System (UPMS) that automates and digitises the university procurement process for goods — from initial requisition to final payment — ensuring full compliance with the Government Procurement Guidelines (Revised 2024) as published by the National Procurement Commission (NPC) of Sri Lanka.

2. System Actors Overview

The UPMS involves six (6) internal actors and three (3) external entities. Each actor interacts with the system at defined stages of the procurement workflow.

2.1 Internal Actors

HOD	Head of Department <i>Requisitioner · Primary Initiator</i>
Role	Initiates the procurement cycle by creating a Purchase Requisition with item specifications (brand names are prohibited), estimated value, and funding source. Attaches SD1 (consumable) or SD2 (capital) forms. Approves procurements below LKR 500,000 jointly with the Dean of Faculty. Submits the Quality Report after delivery to authorise payment release.

Actions	Create Requisition • Attach SD1/SD2 • Approve <LKR 500k • Submit Quality Report • Route BES Report
----------------	--

BUR	Bursar <i>Finance Gate · Fund Verification</i>
Role	Confirms fund availability before any requisition is allowed to proceed. Acts as the financial gate — the system must verify with the Bursar's office before moving to procurement method selection. Provides budget codes and spending authority confirmation.
Actions	Verify Fund Availability • Budget Confirmation

SDC	Supplies Division Clerk <i>Procurement Operations · Bid Coordinator</i>
Role	Manages the day-to-day operations of the tender process. Selects the procurement method (Shopping/NCB based on value threshold), maintains the registered supplier catalog filtered by category, issues bid documents upon payment of the document fee, enforces minimum bid periods (NCB = 21 days minimum), and coordinates the public bid opening event. Pushes tender data to promise.lk.
Actions	Select Method • Manage Supplier Catalog • Issue Bid Documents • Coordinate Bid Opening • Push to promise.lk

TEC	TEC Member <i>Technical Evaluation Committee · Appointed by Vice Chancellor</i>
Role	Mandatory for procurements exceeding LKR 500,000. Appointed by the Vice Chancellor. Conducts preliminary examination (bid bond validity, VAT/SSCL compliance, signatures), performs technical compliance evaluation of bids, conducts financial comparison, and contributes to the Bid Evaluation Summary (BES) report. Must sign a digital declaration of non-collusion before evaluation begins.
Actions	Preliminary Examination • Technical Evaluation • Financial Comparison • Sign Non-Collusion Declaration

TB	Tender Board Member <i>Approval Authority · Contract Oversight</i>
Role	Reviews and digitally approves the BES report at the appropriate board level (Faculty Minor/Major, Management Board, or University Board/Council) based on the procurement value. Authorises the system to generate the Purchase Order and monitors the submission of the Performance Bond by the winning bidder.
Actions	Approve BES Report • Authorise PO Generation • Track Performance Bond

STK	Storekeeper <i>Delivery Verification · GRN Generation</i>
Role	Receives delivered goods and generates the Goods Received Note (GRN) in the system. The GRN is a mandatory prerequisite before the user department can submit a Quality Report and before Finance can process any payment to the supplier.
Actions	Generate GRN · Verify Delivery

2.2 External Actors

SUP	Supplier / Bidder <i>External · Registered Vendor</i>
Role	Registered external vendors who download bid documents (after paying the document fee), upload sealed bids along with a 120-day Bid Bond (Bank Guarantee), and declare their VAT/SSCL registration number. A missing or invalid VAT number results in automatic system rejection. Suppliers receive award notifications and must submit a Performance Bond upon winning a contract.
Actions	Download Bid Documents · Submit Sealed Bid + Bond · Declare VAT/SSCL · Receive Award Notification · Submit Performance Bond · Deliver Goods

FIN	Finance Division <i>External · Payment Processing</i>
Role	Processes supplier payments only after the Quality Report has been approved by the user department. The system automatically flags payment delays to support SLA tracking and supplier satisfaction. Finance also handles document fee receipts from bidders.
Actions	Process Payment · Monitor SLA Flags

eGP	promise.lk <i>«External System» · Government e-Procurement Portal</i>
Role	The government's e-Government Procurement (e-GP) portal aligned to Chapter 13 of the Procurement Manual 2024. The UPMS must push relevant tender data to this portal for Shopping method tenders, either via direct API integration or interface mirroring, as Sri Lanka progressively transitions to fully digitised public procurement.
Actions	Receive Tender Data (push) · Shopping Method Tenders

3. Approval Matrix

The system routes the Bid Evaluation Summary (BES) report for digital signature based on the estimated value of the procurement. The table below defines the threshold-based approval authority.

Procurement Value (LKR)	Approval Authority
< LKR 500,000	Head of Department + Dean of Faculty
LKR 500,000 – Faculty Limit	TEC + Faculty Minor/Major Board
Institutional Limit	Management Board
Statutory Limit	University Board
> LKR 500,000 (High Value)	TEC (mandatory) → University Council

Note: Exact LKR threshold values for Faculty Board, Management Board, and University Board limits must be confirmed against the latest university statutes and the Procurement Manual 2024.

4. Use Case Specification

The following use cases describe all system interactions grouped by workflow phase. Key use cases (marked with ★) are mandatory routing nodes that govern the flow of the entire procurement cycle.

Phase 1: Requisition & Planning			
#	Use Case	Actor(s)	Description
UC-01	Create purchase requisition	Head of Department	HOD creates a new requisition with item specs (no brand names), estimated value, and funding source.
UC-02	Specify item details	Head of Department	HOD enters detailed specifications, ensuring brand names are not referenced to maintain fair competition.
UC-03	★ Verify fund availability	Bursar	System checks with Bursar's office; requisition is blocked if funds are unavailable.
UC-04	Attach SD1 / SD2 form	Head of Department	HOD attaches the appropriate standard form: SD1 for consumables, SD2 for capital items.

Phase 2: Procurement Method Selection			
#	Use Case	Actor(s)	Description

UC-05	★ Select procurement method	Supplies Division Clerk	System determines Shopping (≤LKR 25M local / ≤LKR 40M foreign) or NCB based on value.
UC-06	Issue RFQ to ≥3 suppliers	Supplies Division Clerk	[Shopping] System sends sealed quotation requests to at least 3 registered suppliers from the catalog.
UC-07	Publish NCB invitation	Supplies Division Clerk	[NCB] System tracks mandatory newspaper advertisements (Sinhala/Tamil + English) with 21-day minimum bidding period.

Phase 3: Bid Publication & Submission

#	Use Case	Actor(s)	Description
UC-08	Manage supplier catalog	Supplies Division Clerk	Clerk maintains a category-filtered catalog of registered suppliers; RFQs are only sent to relevant vendors.
UC-09	Issue bid documents	Supplies Division Clerk, Supplier	Bidders pay a non-refundable document fee (e.g. LKR 8,000 or LKR 12,500) to access bid documents.
UC-10	Submit sealed bid + bid bond	Supplier / Bidder	Suppliers upload sealed bids with a 120-day Bid Bond (Bank Guarantee). System alerts if bond is missing.
UC-11	Conduct public bid opening	Supplies Division Clerk	System schedules a public (virtual or physical) opening; late bids are automatically rejected.

Phase 4: Bid Evaluation

#	Use Case	Actor(s)	Description
UC-12	Preliminary examination	TEC Member	Check for Bid Bond validity, VAT/SSCL registration, and required signatures. Automatic rejection if non-compliant.
UC-13	★ Technical evaluation	TEC Member	Mandatory for values >LKR 500,000. TEC appointed by Vice Chancellor conducts technical compliance review.
UC-14	Financial evaluation	TEC Member	Comparison of commercial bids after technical compliance is confirmed; lowest evaluated compliant bid wins.
UC-15	Sign non-collusion declaration	TEC Member	All committee members must digitally sign the declaration of

		non-collusion before evaluation begins.
--	--	---

Phase 5: Approval & Contract Award

#	Use Case	Actor(s)	Description
UC-16	★ Route BES report for approval	Tender Board Member	System auto-routes the Bid Evaluation Summary to the correct authority based on procurement value threshold.
UC-17	Generate purchase order	Tender Board Member	PO is automatically generated upon final digital approval from the authorised board.
UC-18	Track performance bond submission	Tender Board Member, Supplier	System tracks whether the winning supplier has submitted the required Performance Bond.

Phase 6: Delivery & Payment

#	Use Case	Actor(s)	Description
UC-19	Generate Goods Received Note (GRN)	Storekeeper	Storekeeper generates GRN upon receiving goods. This is a mandatory gate before quality review and payment.
UC-20	Submit quality report	Head of Department	User department submits quality assessment report; payment is blocked until this is approved.
UC-21	Process supplier payment	Finance Division	Finance processes payment only after Quality Report approval; PO and GRN must be on record.
UC-22	Flag payment delays (SLA alert)	Finance Division	System flags overdue payments to improve supplier satisfaction and maintain SLA compliance.

5. Key Business Rules & Constraints

5.1 Bid Period Enforcement

- Shopping / RFQ: minimum bidding period of 5 days
- NCB: minimum bidding period of 21 days — enforced by the system
- Late bids are automatically rejected without exception

5.2 Tax Compliance

- Bidders must declare their VAT/SSCL registration number
- Failure to declare results in automatic rejection at preliminary examination

5.3 Conflict of Interest

- All committee members must digitally sign the declaration of non-collusion before evaluation
- Any member with a conflict of interest must disassociate from the procurement

5.4 Proprietary / Single-Source Items

- If only one supplier exists, the user must upload a Propriety Certificate justifying single-source purchase
- Direct contracting is permitted only in specific justified circumstances per the Procurement Manual 2024

5.5 Anti-Slicing Rule

- Contracts must not be artificially split to circumvent procurement thresholds
- The system should flag requisitions that appear to sub-divide a single requirement

5.6 Document Fee

- Bidders must pay a non-refundable document fee to download bid documents
- Typical fees: LKR 8,000 (standard) or LKR 12,500 (complex/high-value procurements)

5.7 Bid Bond (Bank Guarantee)

- Required for all bids; must be valid for 120 days from the bid submission date
- System alerts suppliers of this requirement and rejects bids submitted without a valid bond

6. External Integrations

6.1 promise.lk (Government e-GP Portal)

The UPMS must integrate with the government's e-procurement portal (promise.lk) as Sri Lanka transitions to digitised public procurement under Chapter 13 of the Procurement Manual 2024. The system must push relevant tender data to this portal for Shopping method tenders, either via direct API integration or interface mirroring.

6.2 Newspaper Publication Tracking

NCB tenders require tracking of mandatory newspaper advertisements. The system must record publication details for at least one Sinhala or Tamil language national newspaper and one English language national newspaper, along with publication dates, to verify compliance with the 21-day minimum period.

7. Next Steps & Recommendations

- Download the official Procurement Manual 2024 from the National Procurement Commission (NPC) website to validate exact LKR thresholds for each approval level.
- Research and document the promise.lk integration API for direct tender data submission.
- Confirm university-specific statute thresholds for Faculty Board vs. Management Board vs. University Board approval limits.
- Design the database schema for: Suppliers, Tenders, Bids, Evaluation Reports, Approval Workflows, Purchase Orders, GRNs.
- Develop wireframes for key screens: Requisition form, Bid evaluation dashboard, Approval routing interface, Payment tracking view.
- Establish UAT plan involving HODs, Supplies Division, TEC members, and Finance Division.

This document is based on the University Procurement SRD and Sri Lanka Procurement Manual 2024 (National Procurement Commission).

It should be reviewed alongside the full Procurement Manual and university statutes for binding procedural detail.
